FOR SMALL MANUFACTURERS

Run your factory from *one clear screen.*

We build simple dashboards, inventory and order systems for small manufacturing businesses. Your stock, purchases, sales and reports stop living in scattered Excel sheets, notebooks and WhatsApp threads — and start living in one system your team can actually use.

Stock lives in your head
You find out an item is finished when a customer is already waiting.

Month-end takes days
Sales, purchases and profit are stitched together from three versions of the same sheet.

Orders disappear in chat
No single view of what is confirmed, in production, or dispatched.

WHAT WE BUILD

01 · REPORTING

Business Dashboard

Know your sales, expenses and profit without chasing registers.

₹2,999 one-time pilot

- ✓ Monthly performance dashboard
- ✓ Sales, expense and profit view
- ✓ Google Sheets or web page
- ✓ Accountant-ready summary
- ✓ 3–4 working days

Best for: owners who need clarity before adding complexity.

02 · STOCK CONTROL

Inventory Management

Stop guessing what is in stock, what moved, and what to reorder.

₹4,999 one-time pilot

- ✓ Product master with codes
- ✓ Purchase and sales registers
- ✓ Live stock and running ledger
- ✓ Low-stock alerts
- ✓ Monthly stock and profit report
- ✓ 5–7 working days

Best for: manufacturers and traders with 20–500 products.

03 · OPERATIONS

Factory Operations

Track orders, production stages and materials in one flow.

₹7,499 one-time pilot

- ✓ Order register with due dates
- ✓ Production status by stage
- ✓ Raw material vs finished goods
- ✓ Dispatch and pending view
- ✓ 7–10 working days

Best for: job-shop factories juggling 10+ live orders.

HOW IT WORKS

01 **20-minute call**
We look at your register, product list and the one report you actually need.

02 **Written scope**
Fields, screens, report, date and price on one page. 50% advance starts the work.

03 **Build & review**
A working version in 3–7 days with your names and sample data. One revision round.

04 **Train & hand over**
Training call, recorded walkthrough, and admin access in your name.

◆ **Every project includes:** written scope, remote setup, one revision round, training call and a screen-recorded walkthrough. **Payment:** 50% to start, 50% on delivery. **You own** the account and the data.

WHY ZEROTH

Fixed scope, fixed price
A one-page scope approved before work or payment. No hourly surprises.

Remote and fast
Meet, build and train online. First working version in 3–7 days.

Your data stays yours
Accounts and admin access in your name. You own the system.

THE FIRST SYSTEM WE RECOMMEND

Zeroth *Inventory Lite.*

A focused inventory system for small manufacturers: product master, purchases, sales, live stock, low-stock alerts and a monthly report. No ERP, no training week, no monthly licence. It is the easiest system to demonstrate — and usually the first one to pay for itself.

INSIDE THE SYSTEM

- ✓ Product master with auto codes
- ✓ Purchase register by supplier
- ✓ Live stock: opening + purchased − sold
- ✓ Low-stock alerts and reorder levels
- ✓ CSV export for your accountant
- ✓ Opening stock per product
- ✓ Sales register by customer
- ✓ Stock ledger with running balance
- ✓ Monthly sales, purchase and profit report
- ✓ Print-ready PDF reports

INVENTORY LITE · PILOT

₹4,999 one-time

Delivery	5–7 working days
Setup	Fully remote
Revisions	1 round included
Support	14 days after delivery
Payment	50% start · 50% delivery

Ask for the live demo link

What you get

- ✓ A working system configured with your products and units
- ✓ Opening stock loaded from your existing list
- ✓ Your purchase and sales formats reflected in the registers
- ✓ Low-stock thresholds agreed with you
- ✓ One training call and a recorded walkthrough

What is not included

- × GST filing, accounting, payroll or statutory compliance
- × Barcode hardware, printers, scanners or labels
- × Machine-level IoT, SCADA or production automation
- × Multi-plant, multi-company or 50-user ERP workflows
- × Ongoing support beyond the first 14 days

PILOT PRICING

SYSTEM	WHAT IT SOLVES	DELIVERY	PILOT PRICE
Business Dashboard	Sales, expenses and profit in one view	3–4 days	₹2,999
Inventory Management	Stock, purchases, sales and low-stock alerts	5–7 days	₹4,999
Factory Operations	Orders, production stages and dispatch	7–10 days	₹7,499

Introductory pilot prices. Scope is agreed in writing before payment. The balance is due after you see the working system. Hardware, paid licences and statutory filings are not included.

START WITH ONE USEFUL SYSTEM

Tell us what you track by hand.

Send a photo of your current register or a rough product list. You will get a straight recommendation, a fixed scope and a delivery date — or an honest "not worth buying yet".
